

KENSINGTON®

Desktop MicroSaver®

Universal Security
System

Offices today have a wide variety of computer and electronic equipment, most of which can be picked up and carried away. Five years ago Kensington set the industry standard in *notebook computer security*. Now we've applied our experience to develop an innovative design for *desktop security*. Desktop MicroSaver® is your solution to rising theft in any office setting because it simply and easily protects all your valuable equipment.

Convenient, Universal Protection

Desktop MicroSaver's universal design safeguards all types of computers and peripherals, quickly and easily.

- Secures up to three pieces of office equipment
- Specially designed security plates bond securely to equipment or desktop surfaces
- Six-foot steel cable links individual items together, or anchors everything to one location
- Additional Desktop MicroSavers are easily added as your security needs grow
- Works with any type of equipment

Easy-to-install Desktop MicroSaver serves as a strong physical and visual deterrent to theft, protecting all your office equipment.

Innovative Security Plates

State-of-the-art security plates with innovative features make Desktop MicroSaver stand far above the competition.

- The round shape, low profile, and snug cable significantly increase the plates' security
- Super-strength glue attaches security plates to almost any surface; plates withstand up to 750 pounds of pull
- Plates may also be attached with optional screws

Anchor System

Use Desktop MicroSaver to securely anchor equipment to your work surface.

One of two ways to use Desktop MicroSaver is to anchor equipment to your desktop or work surface.

- Security plate may be positioned unobtrusively on the back of a desk or table
- Additional security plates available if equipment must be moved later

Daisy Chain System

Another way to utilize Desktop MicroSaver is as a “daisy chain”. Linked equipment is heavy and awkward to steal, plus Desktop MicroSaver serves as an immediate visual deterrent to theft.

- Changing desks is still possible, and all components of the Desktop MicroSaver go with you when you move
- Multiple Desktop MicroSavers may be used sequentially to protect a large number of items

Package Contents

- Lock and 6' cable
- 2 keys
- 3 security plates
- Tube of instant-bond glue
- Complete instructions

Other Components Available Separately
